

AGILE PRODUCT OWNERSHIP

TESTIMONIALS

“The course was professionally delivered with a lot of invaluable learnings, yet at a flexible pace where more in-depth discussions on certain areas raised by participants can be looked into and answered comprehensively. Enjoyed the fun interaction activities, discussions, friendship made in an open, warm, learning environment created throughout the course. It was the best experience I have had attending a course”

“This would have to be the best course I’ve ever attended for several reasons. The content was spot on for me and covered what I needed it to cover. Bruce was an excellent trainer... able to articulate the content in a way that was easily understood and particularly helped along with all the practical exercises. I also appreciate the offer of support after the course”

DESCRIPTION

The IC Agile Product Ownership track emphasises customer-focused approaches and practices to maximise value delivery at various levels within organisations. The learning outcomes highlight concepts around organisational alignment, adaptive planning, establishment of value teams to set priorities and techniques for spreading value-based approaches such as product road-mapping, progressive elaboration and frequent cross-programme communication.

THIS COURSE COVERS...

... The product owner role in Scrum and a range of tools and techniques that allow a product owner to take a project from the concept stage through to securing funding and ultimately through to delivering value to the organisation.

ICAGILE CERTIFICATION

On successful completion, you'll earn the IC Agile Certified Professional in Agile Product Ownership (ICP-APO). This course can be run in Auckland, Wellington and Christchurch as a public or private course. Please contact us for more information.

cont'd...

SUMMARY

Agile Product Ownership teaches the skills and behaviours for Value Management and techniques and tools to help a product owner relate the scope of a project to an organisation's goals, to apply strategies to create a shared understanding of the value of a project and to support the delivery of value at the project level.
