

# LEAN BUSINESS ANALYSIS

---

## DESCRIPTION

This course has been designed and developed by seasoned, practising Business Analysis professionals working in the Plan Driven and Change Driven Agile arenas. It is aimed at new Business Analysts and is designed to quickly inject our practical, working knowledge of what you need to know in your BA role in your team.

This is not your typical theory-driven training. It is hands-on, real-world learning delivered by senior consultants working in New Zealand's largest software quality-focused consultancy – straight from the coal-face. By the end of this course, you will have a clear understanding of your responsibilities, some proven approaches to support you in both Plan Driven and Change Driven environments and more than a few tips, techniques and templates to support your success in delivering clear business value.

## LEARNING OUTCOMES

At the end of this course, participants will be able to:

- Apply a Lean Business Analysis Framework when undertaking analysis for any change initiative
- Distinguish between a business problem and a business solution
- Identify and plan the activities needed to produce business analysis deliverables for an initiative
- Apply various techniques when eliciting and modelling requirements
- Produce effective, testable requirements that describe the value to be realised by an initiative
- Communicate needs with User Story and Requirements Statements
- Identify the attributes of a good requirement
- Understand how to manage requirements throughout the project lifecycle
- Manage acceptance activities of a solution

## SUMMARY

This course is aimed at new Business Analysts and is designed to quickly inject our practical, working knowledge of what you need to know in your BA role in your team.
